CAREER OBJECTIVE:

Aiming to be a part of competitive and challenging environment where I can establish an enjoyable career for myself. Eager to embark on a dynamic career in the technology industry, leveraging my programming skills, creativity, and problem-solving abilities to contribute to cutting-edge projects and drive innovation.

EDUCATION:

- **BFA (Animation & Gaming)** from Digiquest Academy.
- **XII (TSBIE)** in Sri Nidhi Jr. College.

EXPERIENCE SUMMARY:

- With around 3+ years of expertise in the software development industry, including application programming and business application development.
- Proficient in analysis, design and development, of Web Applications using Microsoft Visual Studio IDE and ASP .NET, ASP .NET Core, C#, Entity Framework, ADO .NET and ASP .NET MVC.
- Strong problem-solving skills and a deep understanding of software development principles.
- Committed to delivering high-quality, scalable, and efficient solutions for complex business challenges.
- Adept at collaborating with cross-functional teams to design and implement innovative software applications.
- Keen on staying updated with the latest industry trends and technologies to ensure the highest level of performance and excellence in software development.
- Working understanding of client-side technologies such as HTML, CSS, Bootstrap and JavaScript.

TECHNICAL SKILLS:

Programming Languages:	C, C++, HTML, CSS, C#.
Web Technologies:	ADO .NET, ASP .NET, ASP .NET MVC
Frameworks:	.Net Framework, ASP .Net MVC, ASP .NET Core.
Database:	MS SQL Server-2018
IDE/Tools:	Visual Studio 2019
Scripting Languages:	JavaScript

Dates	Organization	Role
Oct 2020 – Present	Amazon	Software Engineer

PROJECTS:

a). Project Name   Staff Management system

Description: -   Data on Leaves, Tours and Dairy Applications is maintained by the Staff Management System. Here, the employee requests a leave of absence or a dairy tour from the department head after the department officer has accepted or denied the request.

Responsibility:
- Developed system architecture and implementation, and suggested enhancements in teams of performance, scalability, maintainability and flexibility.
- Several Front Views Interfaces were designed.
- Implemented coding for database design and requirements.
- Continuity Officer verify the applicant's leave status across all modules and in the dashboards of particular officers with wise reports.
- Back-end code for navigation and crucial situations, such as data storing into databases, has been developed.

b) Project Name   Policy Administration System

Description: Details of the Consumer and, businesses and policies of the consumer are managed in the application. Here, an agent able to manage all the details of the consumer, businesses, properties and polices. Agent can add a consumer and businesses of the consumer, properties of the business.

Responsibility: Agile/Scrum methodology is used to create and maintain the application utilising the ASP.NET Core Web Api and microservice. Developed system architecture and implementation, and suggested enhancements in teams of performance, scalability, maintainability and flexibility.
